ERP solutions for

OIL & GAS
Oil | Gas | Retail | Bunker Suppliers

Organizations must be able to sail blindly on their automation. Not with an IT company that goes wherever the wind may take it, but with a solid and reliable partner with years of experience. The dynamics of automation processes require a visible beacon and a clear horizon, a compass that gives direction and can find its way at sea. To do this, people focus on a landmark, a place that is familiar and known with certainty: a lighthouse, also called a pillar.

Logic Vision is that beacon, *the reliable pillar.*

LOGICVISION

LOGICVISION

LOGIC VISION

Established in 1992, Logic Vision is a software supplier that supports business processes for organizations in the branches Oil & Gas, Maritime and Production. Since 2003 Logic Vision has become a Microsoft Gold Partner, specializing in business software integrated with Microsoft Dynamics NAV, CRM and Office 365.
